**A&M
GLOBAL**

Your global Partner
for sustainable
apparel

A&M Global Ltd. is committed to working with leading industry eco-communities to develop our preferred fiber portfolio and to improving industry practices to continually bring positive environmental and societal changes for our communities.

Having a positive impact has always been at the heart of A&M Global Ltd. Our ethical approach started back in 2010 with setting our social and ethical compliance strategy across our supply base. Our vision has always been people, passion and partnership both internally and externally.

WHY CHOOSE US

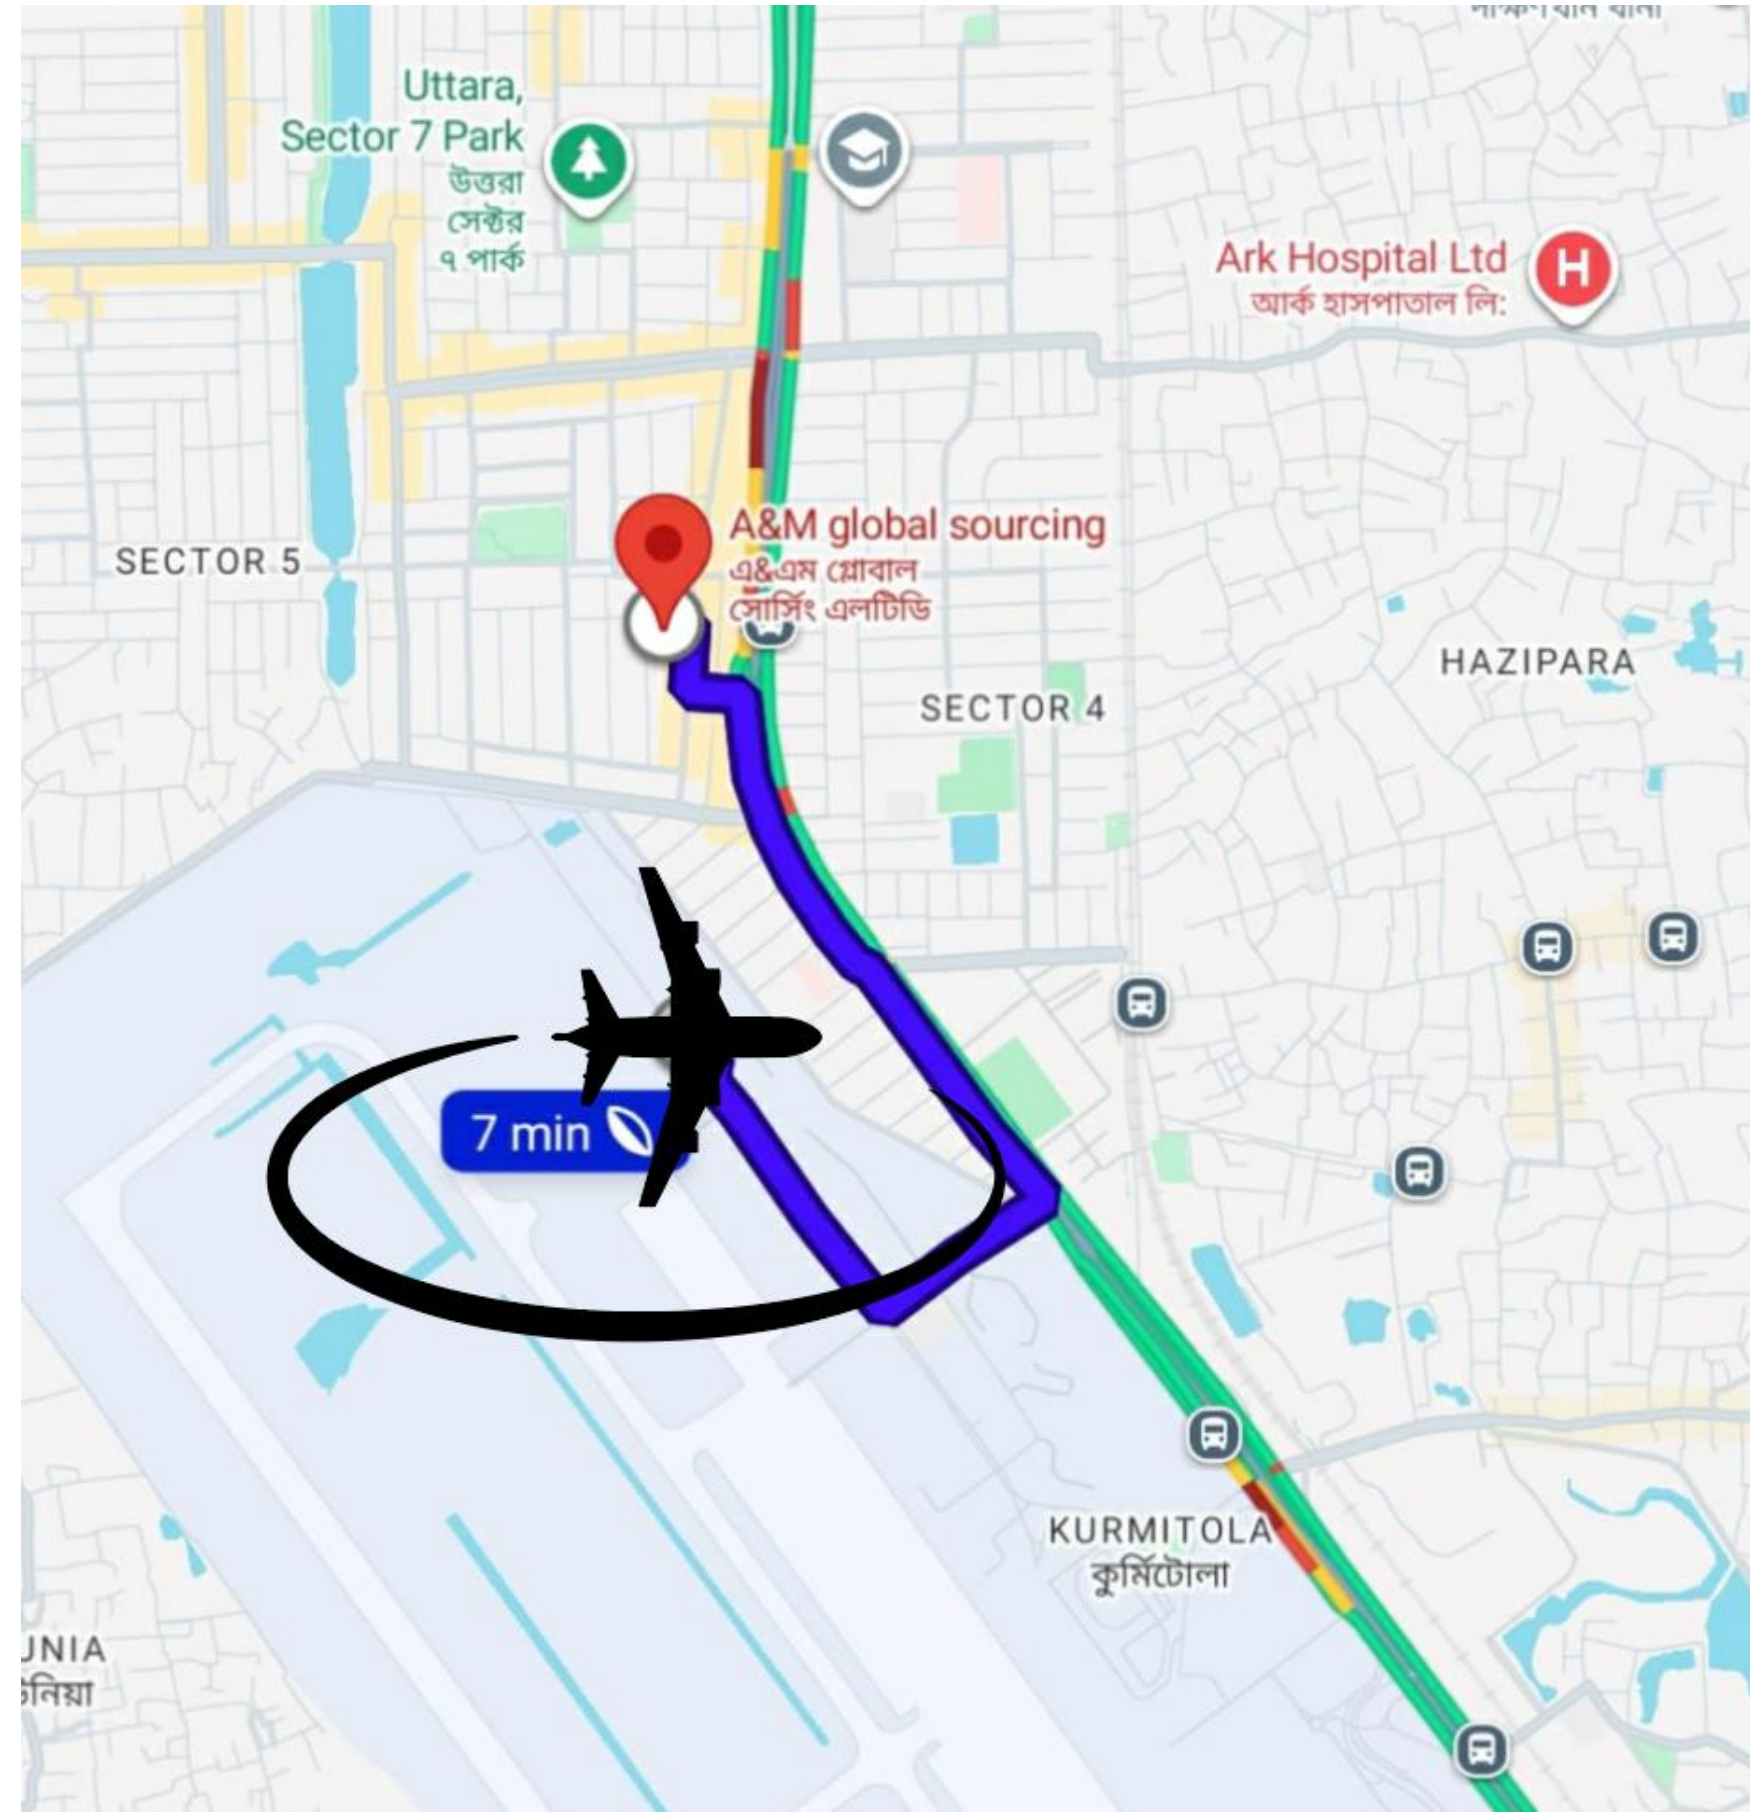

- 1 Agile operating frameworks optimized for minimized turnaround times, reduced profit margins, and adaptive scalability.
- 2 Strategic commitment to eco-conscious and ethical merchandise solutions.
- 3 Established global supply chain and manufacturing infrastructure across primary cost-efficient and tariff-exempt regions.
- 4 Aggressively priced product portfolio for maximum market competitiveness.

Quality, Innovation, and Sustainability

At **A&M Global Ltd.**, we pride ourselves on using a diverse range of high-quality yarns to meet the unique needs of our clients. From **Cotton, Pima Cotton, Organic Cotton, and Modal** for premium comfort to **Recycled Cotton, Recycled Polyester, and BCI-certified yarns** for sustainability, we ensure every garment reflects exceptional quality.

Our innovative approach includes specialty yarns like **Snow Yarn, Naps Yarn, Cyro Yarn, and Spiral Yarn**, allowing us to create products with remarkable textures, patterns, and durability. This commitment to excellence ensures that we deliver stylish, functional, and eco-friendly apparel tailored to your requirements

Knitting Machinery

A&M Global Ltd is equipped with advanced knitting machines ensuring precision and high-quality fabric production. With a versatile setup, we cater to a wide range of fabric requirements efficiently while maintaining exceptional standards

Knitting Process

At **A&M Global Ltd**, we use advanced knitting techniques to transform yarn into high-quality, durable, and elastic fabrics suitable for various garments.

The process starts with design evaluation and machine setup, followed by sample production and approval before bulk production. Each fabric, made of interlocking loops, is carefully inspected to ensure consistency and quality. Our precision-driven approach ensures premium fabrics that meet global standards.

Production Flowchart of Knitting Section:

Sample fabric → Design analysis → Machine selection → Setting the machine for the specific design → Sample Knitting → Sample approval → Bulk Production → Grey fabric inspection

Dyeing Department

At **A&M Global Ltd**, dyeing is a vital process where fabrics are transformed into vibrant, long-lasting materials with precision and care. Using advanced techniques, we ensure consistent colors, durability, and premium quality in every garment.

Our Dyeing Process:

Preparation: Fabrics undergo cleaning, desizing, scouring, and bleaching to remove impurities, ensuring optimal color absorption.

Dyeing: Fabrics are immersed in a carefully prepared dye bath, with temperature and time controlled for shade consistency. Dyeing methods include both fabric and garment dyeing, with sample checks to ensure shade accuracy.

Post-Dyeing: Fabrics are soaped to remove excess dye, treated for colorfastness, softened for texture, and rinsed thoroughly before drying.

Inspection Department

At **A&M Global Ltd**, fabric inspection ensures every material meets the highest quality standards before production. Our comprehensive, multi-step process identifies and addresses any defects to guarantee flawless results.

Our Inspection Process:

1.Pre-Production Inspection:

Fabric samples tested for quality, durability, and color accuracy.

Shrinkage, strength, and colorfastness are checked.

Samples approved by the buyer before production.

2.In-Process Inspection:

Fabrics inspected for defects (stains, holes, misprints) using a 4-point system.

Defects documented and corrected during production.

3.Final Inspection:

Garments checked for size, fit, and specifications.

Labeling, packaging, and metal detection (if needed) ensure safety and compliance.

Warehouse

The Warehouse at **A&M Global Ltd** plays a vital role in ensuring efficient storage and management of raw materials and finished goods. Equipped with advanced inventory systems, it allows for organized tracking, storage, and dispatch of products.

Efficient Storage and Timely Deliveries

With strict quality handling protocols and climate-controlled conditions, we safeguard the integrity of fabrics and garments. Our seamless coordination with the production units ensures timely delivery of raw materials and on schedule shipment of finished goods, supporting our commitment to efficiency and customer satisfaction.

At **A&M Global Ltd**, ensuring a safe and sustainable work environment is a top priority. As part of this commitment, we have successfully undergone inspections by the **RMG Sustainability Council (RSC)**, a leading initiative for workplace safety in Bangladesh's RMG industry.

Our Progress:

- **Remediation Status:** Behind schedule but progressing rapidly.
- **Progress Rate:** 98%.
- **Safety Training:** Ongoing with active worker participation.
- **Total Workers Covered:** 530 employees.

The **RSC's** inspection of our structural, fire, and electrical safety measures highlights our dedication to improving workplace conditions. Alongside safety enhancements, our ongoing safety training programs empower employees to prioritize their well-being.

Safia Apparels Ltd remains steadfast in its mission to provide a secure, sustainable, and thriving workplace for all employees.

CORE FUNCTION

At **A&M Global Ltd**, we are dedicated to providing top-notch services that cater to the diverse needs of our global clients. From design to delivery, we ensure every step of the process reflects our commitment to quality, precision, and customer satisfaction. Here's what we offer:

Custom Garment Production

Knitwear for men, women, and children, from basic to intricate designs.

Fabric Development & Sourcing

Premium fabrics like jersey, rib, fleece, and more from trusted suppliers.

Knitting, Dyeing & Finishing

Advanced machinery ensures durable fabrics with vibrant, eco-friendly colors.

Embroidery & Printing

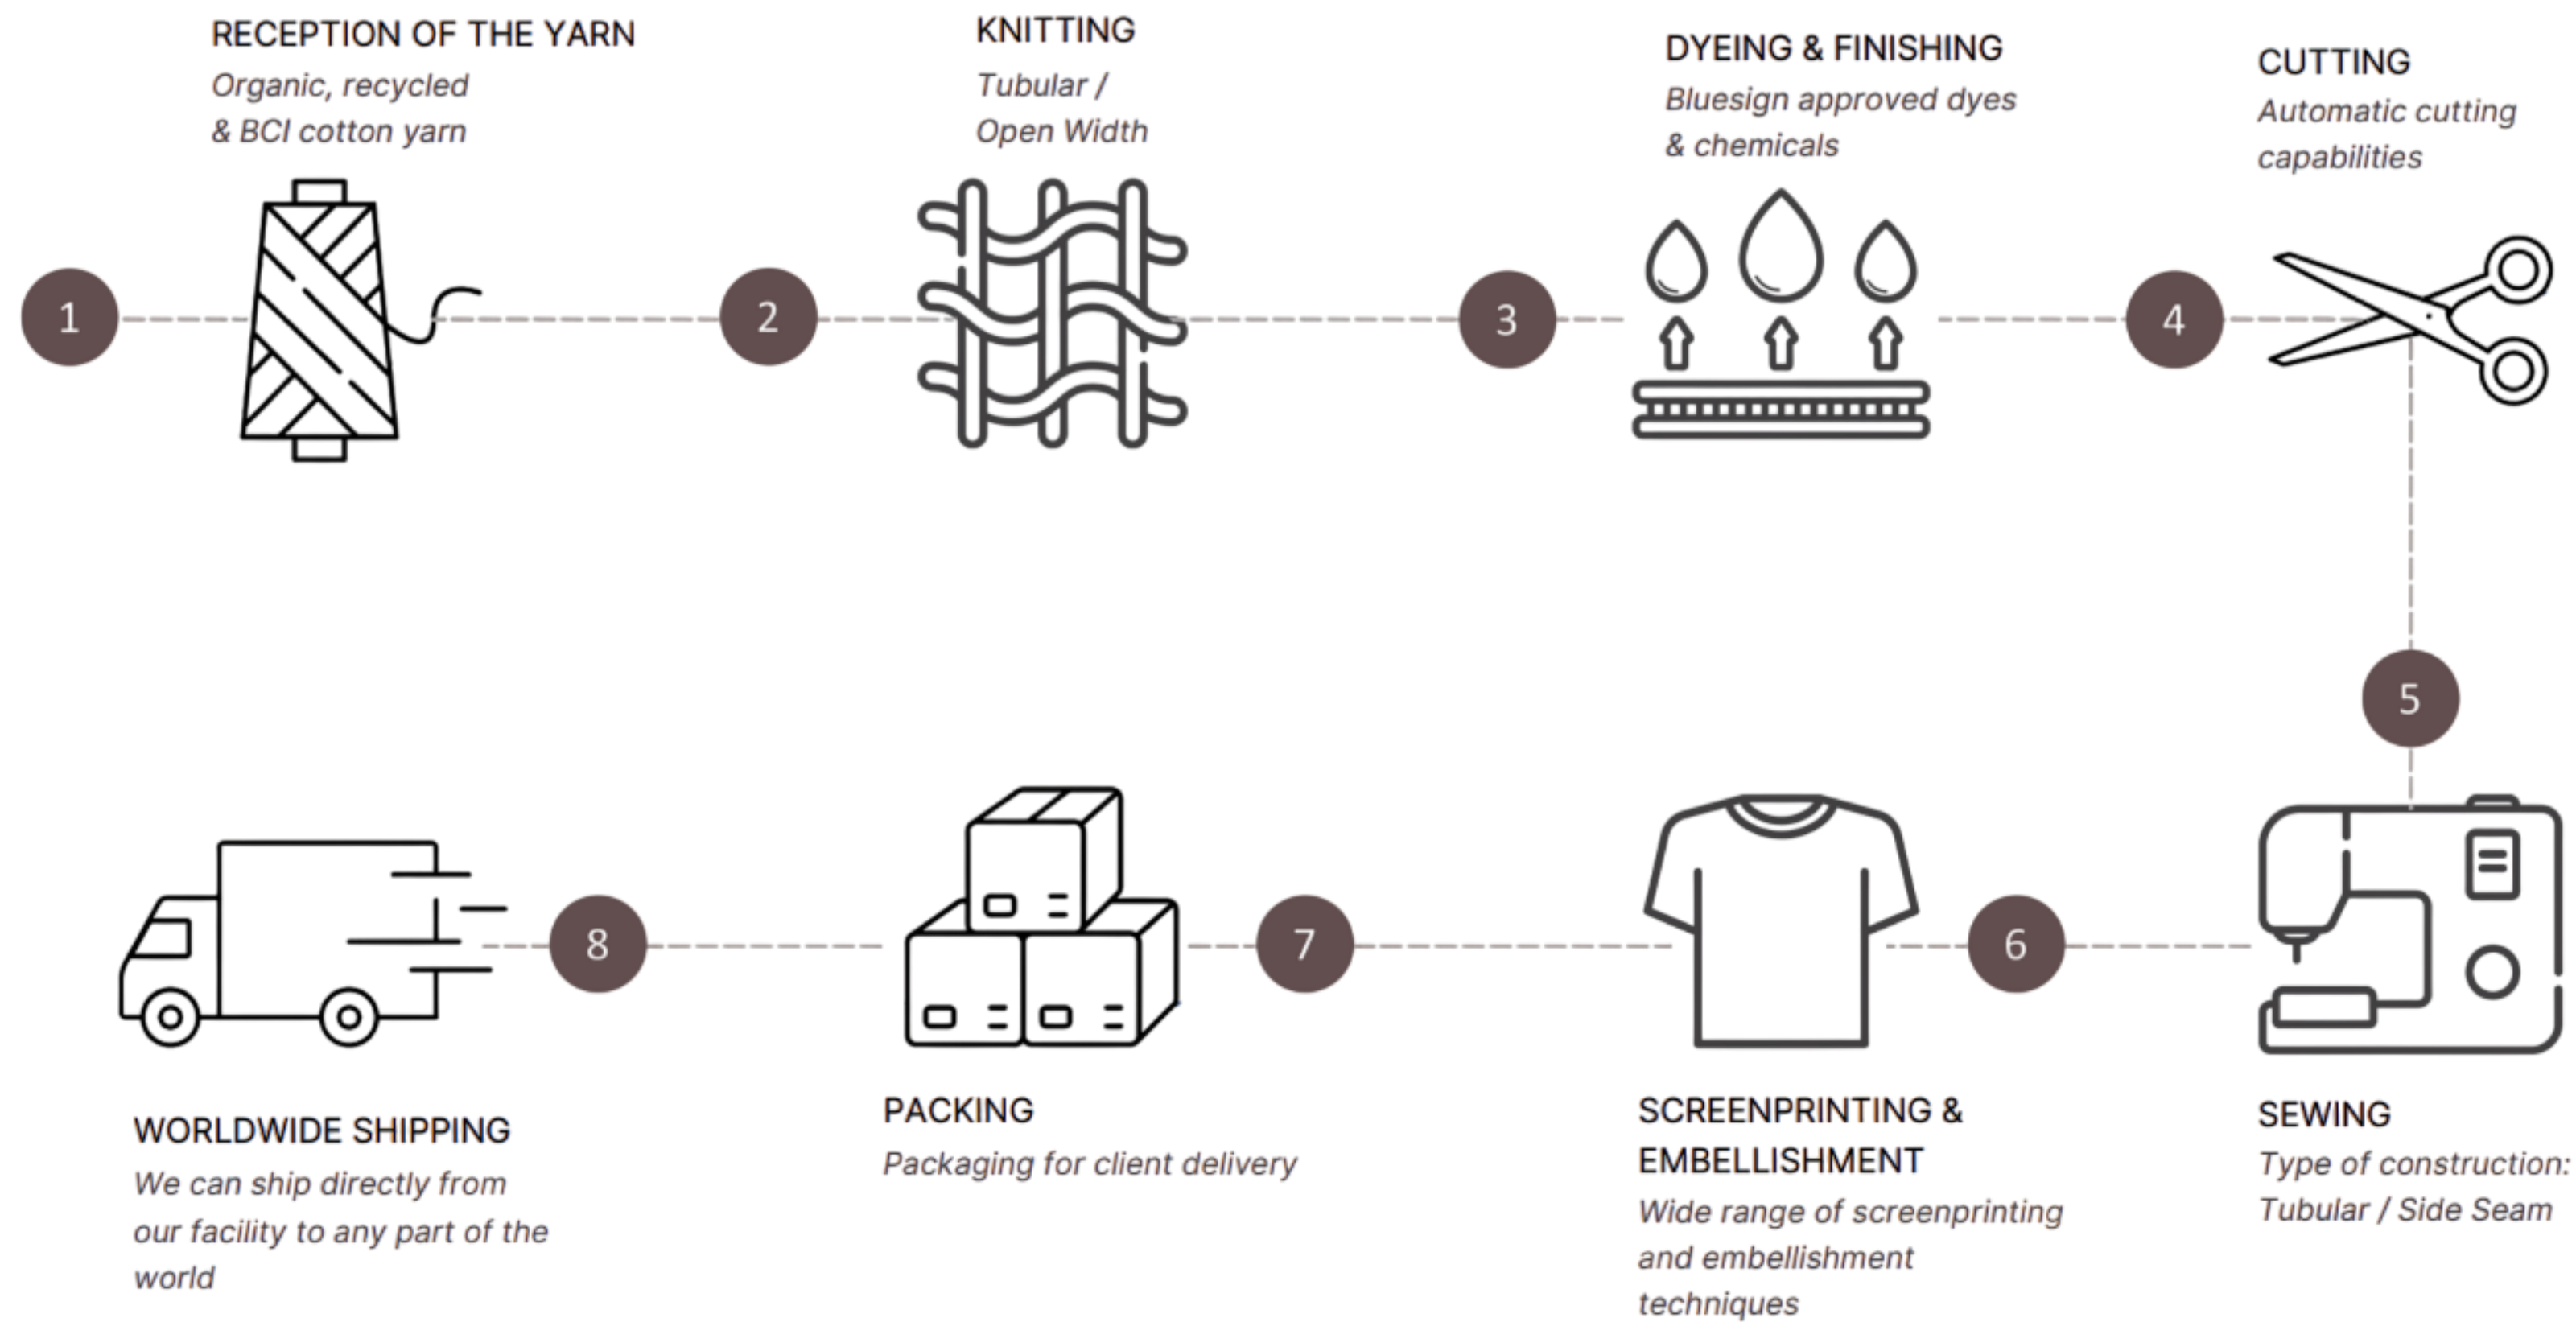

Precision detailing with intricate embroidery and bold printing designs.

Quality Control

Strict inspections at every stage guarantee flawless, international-standard garments.

Sustainability Focus

Eco-friendly methods and practices reflect our commitment to the planet

Intelligent Machine:

- A. Plotter(marker copier)
- B. Fabric inspection machine
- C. Electric scissors
- D. Automatic fabric spreading machine
- E. Automatic garment cutting machine

Our factory is currently equipped with the most advanced intelligent facilities, achieving full digitalization from cutting to finishing.
